

DVX/CDX AutoLoader

DESCRIPTION

The DVX/CDX Autoloader option fully automates DVD and CD testing. It is a standalone system that includes a built-in PC with Windows XP. Just add monitor, keyboard, mouse, and printer, and you're ready to go to work.

In automation mode, DVD and CD discs are tested, and the detailed results are automatically saved.

The user can set the criteria for PASS or FAIL, and the failed discs are unloaded to a separate stack.

Automation can be turned off to use DVX or CDX in its normal mode.

APPLICATIONS

- Incoming Inspection / Quality Control
- DVD/CD Duplication
- Pre-Mastering
- Media & Writer Qualification
- Archiving

Features

- 250 Disc Capacity
- Works with DVX or CDX Analyzers
